### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 5, 6, and 9-14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by US 4,139,342 or IEEE document.

Both references disclose an optical film comprising PMMA having Rhodamine B dispersed therein. See '342 col. 3.

Claims 1-6, 9-14 and 17-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by US 6,115,344.

The reference discloses an optical film formed of PMMA having Rhodamine B dispersed therein where the film may be formed by spin-coating to a thickness of less than 1um. See col. 12.

Claims 1, 2, 5, 6, and 9-14 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by US 6,413,655 or US 6,432,610 or Optics Communications document.

All three references disclose an optical film formed of PMMA having Rhodamine B dispersed therein. See '655 col. 15 and '610 col. 12, 13, 21.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7, 8, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over all of the above cited references.

All of the above cited references disclose an optical film formed of PMMA having Rhodamine B dispersed therein. The references are silent as to the specific amounts of PMMA, Rhodamine, and solvent used to form the optical film. However, it would have been obvious to one of ordinary skill in the art to use various combinations with the reasoned expectation of obtaining the optimal results.
